

BECOME A CHEMISTRY PARTNER!

In 2022, Finnish high school students and graduates accomplished in chemistry will be presented with a volume of Finnish Chemical Magazine (*Kemia-lehti*) for the ninth time. So far, over 8,000 students have been thus acknowledged for their chemistry performance.

In Finnish Chemical Magazine, the future professionals will read about the significance and possibilities of chemistry and, perhaps, find inspiration for a career in chemistry.

Half of each gift volume for students is paid by Finnish Chemical Magazine, half by sponsors.

You are welcome to become a partner by supporting the campaign with at least EUR 2,550 (+ VAT), which will be invoiced in June 2022.

As a partner you will get more than you give:

- Advertisement space in Finnish Chemical Magazine (print magazine or e-newsletter) in May–December, 2022, for the amount of your partnership attendance.
- Your company logo in the magazine's own campaign promotion advertisement.
- Good publicity in the school festivities and Finnish Chemical Magazine's news items covering the campaign.

Got interested?

Sign up as a partner by April 30, 2022.
